Getting started guide

Your properties, managed simply.

Welcome to CizaImmo. This guide shows you, step by step, how to set up your rental management and get the most out of it every day. Keep it close at hand.

YOUR FIRST 5 STEPS

1 Create your building

- Buildings menu, then “New building”: name of the residence, full address and city.
- Enter the property's value: it is used to automatically calculate your return (ROI).
- Add at least one photo: it is the property's passport photo, the one that identifies it everywhere on the platform.
- One building equals one block: your plan depends on the number of blocks you manage.

2 Add your units (apartments)

- From the building's page, add each apartment: door number, floor, unit type.
- Batch creation: create several units at once, for example ten apartments in one go.
- Unit type: T1, T2, T3, T4... depending on the number of rooms.
- Enter the monthly rent for each unit — it can differ from one unit to another.

3 Add your tenants

- Name, phone and email: the phone number is used for reminders and for sending receipts.
- Attach the ID document to the tenant's file.
- Each tenant has a complete record: contact details, documents and their payment history.

YOUR FIRST 5 STEPS (CONTINUED)

4 Create the leases

- Link the tenant to their unit, then set the lease start and end dates.
- Enter the rent amount and the due day (for example the 5th of each month).
- Proration is automatic: a lease starting on the 11th only bills 20 days in the first month.
- The platform then generates the due dates month by month — no calculations to redo.

5 Record the payments

- Rents page: choose the month's due date, then “Record a payment”.
- Full or partial payment: the remaining balance due is displayed automatically.
- A PDF receipt is generated for each payment: send it to your tenant in one click.
- A receipt already sent can be resent at any time from the payment history.
- Reminder: you record the payments you receive — CizaImmo never collects your rents.

MAKING THE MOST OF EVERY DAY

The dashboard

- At a glance: the rents collected, the amounts expected and the month's late payments.
- Data colour code: green = paid or collected, red = late or problem.
- Amber = attention or upcoming (vacant property, due date approaching); orange = partial payment.

The Rents page

- Filter by month, by building or by status to find a specific due date.
- Record a payment, full or partial, directly from the rent line.
- Remind a late tenant by email or by WhatsApp, in one click.
- Export your rents to Excel for your accounting.

Expenses and returns

- Record each property expense: repairs, charges, maintenance, with its date and amount.
- Each property's ROI updates automatically: (income − expenses) ÷ property value.
- Reports bring together income and expenses, by period and by building.

MAKING THE MOST OF EVERY DAY (CONTINUED)

Alerts

- Late rents and leases ending soon: the platform flags what needs your attention.
- A prolonged vacancy is also highlighted, so you can get the property rented again.

The property passport

- The complete record of each building: its photo, its units, its leases and its history.
- The property's whole file in one place, accessible in a few seconds.

Documents

- Proofs of ownership, ID documents and authorizations, kept on file.
- Your documents stay private: only you and the platform team have access to them.

DEPENDING ON YOUR ROLE

Owner: connect a property manager

- Enter the manager's Display ID (for example CIM-000123) to send them a connection request.
- After they accept and the platform validates, assign them the buildings of your choice.
- You keep full visibility over all your buildings' data, even those managed by a manager.

Manager: access limited to your mandates

- You only see the buildings that owners have expressly assigned to you.
- Files stay separate: each owner, their own data, in full confidentiality.

Built-in messages

- Write to the platform team from your space, for any question about your file.
- Connected owners and managers also exchange directly in the application.

The verified listings showcase

- With the Pro and Agency plans, publish your vacant apartments on the public showcase.
- Each listing is verified by the platform before going online: a mark of trust for your future tenants.

YOUR SUBSCRIPTION

Your free 30-day trial starts as soon as your account is approved — with the Starter plan, so you can discover the platform with no commitment.

- The plans, by number of blocks: Starter = 1 block, Pro = 5 blocks, Agency = unlimited blocks.
- Before the trial ends, choose your continuation plan from the Subscription page.
- You only pay the subscription: never any commission on your rents.
- If a payment fails, a grace period applies; without settlement, the account then switches to read-only.
- In read-only mode, your data is kept: reactivate your account at any time by paying.

FREQUENTLY ASKED QUESTIONS

Does CizaImmo touch my rents?
No. CizaImmo never collects your rents: you record the payments received and the platform logs them. Our only revenue is the subscription.

Can I manage my properties from abroad?
Yes. The platform works on the web and on mobile, in 12 currencies (including the Burundian franc, the euro and the dollar), in French and in English.

How do I add a property manager?
By their Display ID: enter their file number, they accept your request, then you assign them your buildings.

Are my documents private?
Yes. They are kept in a private file: only you and the platform team have access to them.

Who do I contact if I have a question?
infos@cizagroup.com · WhatsApp +1 514 502 9503.
